About Me

Computer Science undergraduate with a specialization in Artificial Intelligence, experienced in developing AI and web-based applications using Python and C. Strong problem-solver focused on delivering effective technical solutions aligned with business needs.

Education

Bachelor of Technology in Artificial Intelligence <i>CGPA: 9.53</i>	Anurag University, Hyderabad	2024 – Present
Intermediate (MPC) <i>Percentage: 97.5%</i>	SR Junior College, Hyderabad	2022 – 2024
SSC <i>CGPA: 9.8</i>	SR Digi School, Hyderabad	2021 – 2022

Technical Skills

Programming: C, Python, Basic Java, JavaScript.
Web Technologies: HTML.
Database: MongoDB (CRUD operations).
Concepts: Data Structures, OOPs, Problem Solving, REST API Development.
Tools and Platforms: Figma, Git, GitHub, Canva.
Soft Skills: Team Work, Communication, Adaptability.

Projects

- AI Medical Diagnosis** [GitHub Link](#) 
- Created a web-based medical diagnosis system with a Python AI backend, enabling users to predict diseases and detect pneumonia from chest X-ray images. Utilized Generative AI to enhance prompt optimization and ensured seamless integration between the front-end and back-end for a smooth user experience.
 - Tools Used:** Python, Flask, HTML, CSS, JavaScript, CouchDB
- WorkMate AI** [GitHub Link](#) 
- Built a full-stack MERN platform for worker-contractor collaboration with attendance tracking and salary slip generation.
 - Implemented role-based access, job posting, multilingual support, loan information, and a tool rental system.
- AI-Based Risk Management System for Banking** [GitHub Link](#) 
- Developed fraud detection models using Logistic Regression, Random Forest, and XGBoost on a dataset with 280K+ transactions.
 - Achieved ROC-AUC > 0.95 using model comparison, hyperparameter tuning, and precision-recall threshold optimization.
 - Technologies:** Python, Scikit-learn, XGBoost.
